

AMENDMENTS TO THE CLAIMS

1-32. (Canceled)

33. (Currently amended) ~~The advancer/retractor of Claim 32,~~ An advancer/retractor,
comprising:

a handle body having, at least, a first medical device and a second medical device secured
thereto;

a first grip connected to the handle body and to the first medical device, wherein
movement of the first grip causes an amplified movement of the first medical device; and

a second grip connected to the handle body and to the second medical device, wherein
movement of the second grip causes an amplified movement of the second medical device,
wherein the first grip includes a first pulley around which the first medical device is looped and
the second grip includes a second pulley around which the second medical device is looped.

34. (Currently amended) ~~The advancer/retractor of Claim 32~~ An advancer/retractor,
comprising:

a handle body having, at least, a first medical device and a second medical device secured
thereto;

a first grip connected to the handle body and to the first medical device, wherein
movement of the first grip causes an amplified movement of the first medical device; and

a second grip connected to the handle body and to the second medical device, wherein
movement of the second grip causes an amplified movement of the second medical device,
wherein the first grip includes a finger ring which forms ~~[[the]]~~ a first pulley and the second grip
includes a finger ring which forms ~~[[the]]~~ a second pulley.

35. (Currently amended) ~~The advancer/retractor of Claim 32~~ An advancer/retractor,
comprising:

a handle body having, at least, a first medical device and a second medical device secured
thereto;

a first grip connected to the handle body and to the first medical device, wherein
movement of the first grip causes an amplified movement of the first medical device; and

a second grip connected to the handle body and to the second medical device, wherein
movement of the second grip causes an amplified movement of the second medical device,
further comprising a catheter coupled to the handle body, wherein the first medical device passes
through the catheter and is advanced and retracted into and out of the catheter with movement of
the first grip and the second medical device passes through the catheter and is advanced and
retracted into and out of the catheter with movement of the second grip.

36. (Currently amended) ~~The advancer/retractor of Claim 32~~ An advancer/retractor,
comprising:

a handle body having, at least, a first medical device and a second medical device secured
thereto;

a first grip connected to the handle body and to the first medical device, wherein
movement of the first grip causes an amplified movement of the first medical device; and

a second grip connected to the handle body and to the second medical device, wherein
movement of the second grip causes an amplified movement of the second medical device,
wherein the first medical device includes a flexible portion which forms a loop at the first grip
and the second medical device includes a flexible portion which forms a loop at the second grip.

37. (Currently amended) The advancer/retractor of Claim ~~[[32]]~~ 33, wherein the first and the second grips are independently advanced or retracted.
